

RCSC Specification Committee Membership Application

The RCSC Specification Committee is responsible for evaluating the current specification to correct an error, improve life safety, promote economic bolting systems, improve predictable behavior, or advance efficient use. RCSC Specification Committee members are required to attend all committee meetings and participate in discussions of issues. Periodic balloting will take place during each specification cycle. Members are required to vote on all ballot issues.

All applicants should expect to serve for the entire specification cycle, which can be up to 6 years. Applicants should carefully evaluate the time commitment and responsibilities before applying for membership on the RCSC Specification Committee.
